

Eva Davis - AI Research & LLM Engineer

Professional Summary:

AI Engineer focused on Large Language Models, Retrieval-Augmented Generation (RAG), fine-tuning, and LLM application frameworks in Python.

Technical Skills:

Python, LLMs, LangChain, RAG, PyTorch, OpenAI API, Vector Databases, Transformers

Work Experience:

- **AI Applications Engineer** - Cognitive AI Systems (2022 - Present)
Implemented enterprise RAG pipelines using Python, LangChain, and vector stores. Integrated OpenAI API and fine-tuned open-source models.

Education:

M.S. in Artificial Intelligence, MIT (2022)
