

John Doe - Senior Software Engineer

Professional Summary:

Experienced Software Engineer specializing in backend infrastructure, REST API design, and distributed systems. Expert in Python, FastAPI, and Docker.

Technical Skills:

Python, FastAPI, Docker, PostgreSQL, AWS, Redis, Git

Work Experience:

- **Senior Python Developer** - TechCorp Innovations (2021 - Present)
Architected high-throughput microservices using Python and FastAPI. Reduced API latency by 40% using Redis caching and optimized PostgreSQL queries.
- **Software Engineer** - CloudScale Systems (2018 - 2021)
Built containerized data pipelines with Python and Docker on AWS ECS.

Education:

B.S. in Computer Science, University of California, Berkeley (2018)
